

JAMES CHANG, MBA

Senior Product Manager, AI-Assisted Builder

jimmychang316@gmail.com · linkedin.com/in/jimmychang316 · github.com/thirstypig · jameschang.co

ABOUT

Senior PM and founder. Ship full-stack products end-to-end using Claude Code for leverage. Own product strategy, architecture, specs, and outcomes—detailed about documentation, taste, and data-driven decisions. Founded Aleph Co., a compliance SaaS for importers, and Pasadena Works, helping independent healthcare practices digitize patient intake and appointment scheduling.

Direct experience with healthcare operations and clinical workflow design. Provided technical support and troubleshooting for clinical staff using Amazing Charts (EHR) and OfficeAlly (practice management). Gained hands-on understanding of HIPAA compliance, scheduling workflows, billing complexity, and where practitioners experience friction.

EXPERIENCE

Jul 2026 — Present

Pasadena Works

Founder · San Gabriel Valley, CA

- Founded Pasadena Works, a practice-operations firm helping independent medical, dental, and eye care practices digitize patient intake, appointment scheduling, and records, and attract new patients. Vendor-neutral; the site serves patients in English, Spanish, and Simplified and Traditional Chinese.
- Built and own an operations platform on Twenty CRM integrated with Cal.com scheduling: bookings automatically create lead records in the CRM, availability syncs from Google Calendar, and each booking triggers a confirmation email.
- Ran on-site discovery at independent practices, mapping patient intake, scheduling, and records workflows in Office Ally and Crystal PM.
- Operate as sole product owner, writing requirements, user stories, and acceptance criteria and shipping them through AI-assisted development.

Sep 2025 — Present

Aleph Co.

Founder & Operator · Los Angeles, CA

- Founded and operate Aleph, a B2B SaaS compliance platform for US importers covering FDA FSVP, CPSIA/CPC, California Prop 65, and multi-state PFAS regulations.
- Own discovery, workflow design, specs, and full-stack delivery as a solo IC, building multiple AI-assisted product prototypes to validate regulated workflows before investing in scale.
- Ship seven additional products in parallel under Aleph Co. — see Projects.

Mar 2022 — Oct 2024

LocaliQ / USA Today Network

*Senior Product Manager ·
Woodland Hills, CA*

- Owned Scheduling SaaS product from 0→1, defining vision and roadmap for a cross-functional pod of engineering, design, QA, and Customer Success.
- 4,900 free + 400 paid accounts in year one; 8,000+ booked appointments in six months via Google Calendar, Outlook, and SMS integrations.
- Reprioritized the roadmap to ship Outlook calendar sync ahead of other planned features after account data showed a large share of users on Microsoft email (Outlook.com, Hotmail) and Microsoft 365, so that segment could book against the calendars they already used.
- Wrote requirements, user stories, and acceptance criteria for core calendar and SMS integrations, making scope and sequencing trade-offs with engineering to accelerate delivery while optimizing for mobile web.
- Shipped core integrations and drove adoption alignment—partnered with Sales and Customer Success to ensure customer success and minimize churn.
- Co-led rollout of Jasper.AI for SEO/marketing automation; contributed to internal GenAI enablement initiatives.

Dec 2019 — Jun 2020

Sunrise Integration

Product / Project Manager · Los Angeles, CA

- Owned WarehouseConnector.com product and integration delivery for OMS/ERP/CRM/WMS workflows used by logistics operators.
- Led Magento → Shopify platform migrations and NetSuite ERP modernization initiatives.

Jun 2019 — Nov 2019

Movley (now Ops Ninja)

Product / Operations Manager · Remote

- Delivered operational dashboards for manufacturing inspections and overseas fulfillment workflows.
- Built and managed distributed operations teams (China, Philippines) supporting U.S. manufacturing customers.

Apr 2018 — Dec 2018

MEDL Mobile

Product / Project Manager · Irvine, CA

- Led requirements, QA, and App Store submissions for native iOS and Android mobile apps across consumer and emerging-tech engagements.
- Coordinated cross-functional delivery for multiple shipped applications under tight timelines with external stakeholders.
- Defined mobile user flows and acceptance criteria and ran QA cycles to ship multiple apps on tight timelines.

2024 — Present

Father's Clinic

Clinical Workflow Support & Technical Operations

- Provided technical support and troubleshooting for clinical staff using Amazing Charts (EHR) and OfficeAlly (practice management).
- Gained direct understanding of HIPAA compliance, scheduling workflows, billing complexity, and where practitioners experience friction.

2016 — 2017

YETI Coolers

Advanced Sourcing Agent, Packaging · Austin, TX

- Managed the packaging and print supply chain across all product lines (hard coolers, soft coolers, apparel, drinkware) with multiple print and packaging vendors.
- Led labeling for the powder-coated drinkware launch, with simultaneous production in China, Mexico, Texas, and Ohio.

EDUCATION

USC Marshall School of Business

Master of Business Administration (MBA), 2012. Class President.

Certifications

- Certified Scrum Product Owner (CSPO), Scrum Alliance · 2019
- Product Management Certificate, Product School · 2018
- Jasper.AI Certified · 2023

SKILLS

Product: 0→1 development and end-to-end ownership, requirements, user stories & acceptance criteria, roadmapping & prioritization, discovery & user research, A/B testing, GenAI integration, native-mobile PM
