ABOUT

Senior PM and founder. Ship full-stack products end-to-end using Claude Code for leverage. Own product strategy, architecture, specs, and outcomes—detailed about documentation, taste, and data-driven decisions. Founded Aleph Co., a compliance SaaS for importers—domain expertise from 15 years sourcing across Asia and US.

Before founding Aleph, I was Senior PM at Gannett/LocaliQ, where I owned Scheduling from concept to shipped product inside a media company and picked up SEO and GenAI ownership along the way. The operator problems I know best aren't confined to one market — they're how I pick what to build next.

Direct experience with healthcare operations and clinical workflow design. Provided technical support and troubleshooting for clinical staff using Amazing Charts (EHR) and OfficeAlly (practice management). Gained hands-on understanding of HIPAA compliance, scheduling workflows, billing complexity, and where practitioners experience friction.

MBA from USC Marshall (2012), CSPO, and a lifetime food blog at The Thirsty Pig. Based in Los Angeles.

EXPERIENCE

Sep 2025 — Present

Aleph Co.

Founder & Operator · Los Angeles, CA

- Founded and operate Aleph, a B2B SaaS compliance platform for US importers covering FDA FSVP, CPSIA/CPC, California Prop 65, and multi-state PFAS regulations.
- Ship seven additional products in parallel under Aleph Co. — see Projects.
- Owned Scheduling SaaS product from 0→1, defining vision and roadmap for a cross-functional pod of engineering, design, QA, and Customer Success.
- 4,900 free + 400 paid accounts in year one; 8,000+ booked appointments in six months via Google Calendar, Outlook, and SMS integrations.
- Shipped core integrations and drove adoption alignment—partnered with Sales and Customer Success to ensure customer success and minimize churn.
- Co-led rollout of Jasper.AI for SEO/marketing automation; contributed to internal GenAI enablement initiatives.
- Owned WarehouseConnector.com product and integration delivery for OMS/ERP/CRM/WMS workflows used by logistics operators.
- Led Magento → Shopify platform migrations and NetSuite ERP modernization initiatives.
- Delivered operational dashboards for manufacturing inspections and overseas fulfillment workflows.
- Built and managed distributed operations teams (China, Philippines) supporting U.S. manufacturing customers.
- Led requirements, QA, and App Store submissions for mobile apps across consumer and emerging-tech engagements.
- Coordinated cross-functional delivery for multiple shipped applications under tight timelines with external stakeholders.

Mar 2022 — Oct 2024

LocaliQ / USA Today Network

Senior Product Manager · Woodland Hills, CA

Dec 2019 — Jun 2020

Sunrise Integration

Product / Project Manager · Los Angeles, CA

Jun 2019 — Nov 2019

Movley (now Ops Ninja)

Product / Operations Manager · Remote

Apr 2018 — Dec 2018

MEDL Mobile

Product / Project Manager · Irvine, CA

2024 — Present

Healthcare Operations

*Clinical Workflow Support &
Technical Operations*

- Provided technical support and troubleshooting for clinical staff using Amazing Charts (EHR) and OfficeAlly (practice management).
- Gained direct understanding of HIPAA compliance, scheduling workflows, billing complexity, and where practitioners experience friction.

2000 — 2017

Earlier · supply chain

*YETI · AT&T · Cheng Loong
(Shanghai) · Cobalt Skys · Spray
Tech · Breeze (Taipei)*

- Fifteen years sourcing products across Asia and the US — global packaging, telecom, paper, and consumer goods.
- Operator domain knowledge that made Aleph Co. a domain-expert play. In 2026, this is the why-not-someone-else moat — not the headline.
